

ENGLISH FOR ENGINEERING

CRICOS 094580G

COURSE OVERVIEW

Kick start your student adventure in Australia with Site Institute's English for Engineering course. English for Engineering provides engaging activities to improve your reading, listening, writing and speaking while preparing you for the Engineering industry. The course is structured at different levels of proficiency and our program integrates the skills you need to improve your English and Engineering vocabulary fast. Progress your communication skills through tailored individual and group activities that are relevant, informative, entertaining and engaging.

The program is designed to develop your skills to:

- Communicate effectively in the Engineering study environment, at home and at the workplace
- Build your English Engineering writing skills
- Present ideas with confidence

ENTRY REQUIREMENTS

- Students must be at least 18 years old.
- Intermediate English language level.
